PROFESSIONAL SUMMARY

Full-stack developer with production experience across two internships, currently shipping features for venture-backed (Y Combinator) client SaaS products at Hypeliv. Strong across React/Next.js and NestJS/Node.js with PostgreSQL/MongoDB, queue-driven async pipelines, and AI/third-party API integrations. Final-year Information Technology undergraduate targeting full-stack and software engineering roles.

EXPERIENCE

• Hypeliv

Software Engineer Intern

May 2026 – Present

- Built frontend and backend features for **Marketlin**, a Y Combinator-backed AI marketing-analytics SaaS (React, Fastify, PostgreSQL/Drizzle), integrating Google Ads, Meta Ads, and GA4 data into an LLM-driven insights pipeline powered by BullMQ/Redis workers.
- Developed backend services for **Creator Vision**, an AI brand-detection platform (NestJS, PostgreSQL, BullMQ), contributing to a multi-signal detection pipeline (Gemini vision + segmentation + audio/OCR) and AWS S3/SES for media storage and transactional email.
- Delivered features end-to-end in an agile, PR-reviewed workflow spanning typed REST APIs, async job workers, and responsive React interfaces, participating in code reviews and sprint planning.

• Techkrate

Full Stack Developer Intern

Jun 2025 – Sep 2025

- Architected and delivered backend modules for a production e-commerce platform (Node.js, Express.js, MongoDB) covering product management, cart, and order-processing flows.
- Built secure REST APIs with JWT authentication and role-based access control, and implemented responsive React.js product-listing and checkout UIs wired to backend business logic.

PROJECTS

- **Momentum – AI Social-Content Platform (Live)** (In-house, Hypeliv) *Next.js, React, NestJS, PostgreSQL/Drizzle, BullMQ, Redis*
 - Built from scratch a multi-tenant platform that generates, schedules, and auto-publishes AI-produced social content (images, reels, captions) to Instagram, LinkedIn, TikTok, and YouTube.
 - Engineered a queue-driven (BullMQ/Redis) generation pipeline across multiple AI providers, with separate admin and client consoles, credit-based billing, and payment webhooks.
- **AutoCrawler – Web Crawling Platform (Live)** *React.js, Node.js, Express.js, MongoDB, Puppeteer, Cheerio, Socket.io, n8n, Docker*
 - Built a hybrid crawler that fetches via Axios/Cheerio and auto-falls back to Puppeteer for JS-heavy pages, with recursive same-domain crawling (configurable depth/page limits) and URL dedup.
 - Streamed granular crawl progress over JWT-authenticated Socket.io with per-user data isolation, history/stats dashboards, and n8n-triggered email reports; containerized with Docker and Nginx.
- **Threads – Real-Time Chat Application (Live)** *React.js, Redux Toolkit, Material UI, Node.js, Express.js, MongoDB, Socket.io, Cloudinary*
 - Built a real-time messaging app with one-on-one and group chat, typing indicators, online-presence tracking, and a friend-request system over cookie-authenticated Socket.io.
 - Secured sessions with JWT in httpOnly cookies, integrated Cloudinary for media sharing, and added an admin dashboard (MUI data-grid + charts) for user, chat, and message management.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C++, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, Material UI, GSAP, Framer Motion
- **Backend:** Node.js, Express.js, NestJS, Fastify, REST APIs, Socket.io, BullMQ, JWT & Firebase Auth
- **Databases & ORM:** PostgreSQL, MongoDB, MySQL, Drizzle, TypeORM, Mongoose, Redis
- **Tools & Cloud:** Git, GitHub, Docker, AWS (S3, SES), Postman, Vercel, Cloudinary

EDUCATION

• Ajay Kumar Garg Engineering College

Bachelor of Technology in Information Technology | CGPA: 7.5+

Ghaziabad, India

2022 – 2026

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Leadership: Captain, College Football Team (2025–26) — led the team to zonal and local tournament wins.
